Product Strategy Board

One site at a time — a company, a country and a marketplace. Prices from two sites are never pooled on one axis.

Presentation

Print / PDF

SCENARIO — 1 simulated price override on KM|US|Shopify. These are not prices the company charges, they are not saved anywhere, and they disappear when this page is reloaded.

US · Shopify · Cutting Board · All series · USD Scenario · Unsaved 1 27 listings · 27 with a price to plot

Meeting scenario

×

COMPANY	COUNTRY	MARKETPLACE	CURRENCY
KM	US	Shopify	USD
1 listing in "GA0150" would be simulated on this site — all of them at the same figure, because a promotion is one price. Applied: Proposed price · Set proposed price 19.99 · GA0150 · 1 listing. The original position stays on the chart as a hollow marker. Active overrides: 1 · simulated on screen: GA0150 · held in this page only, and cleared by a reload.
