Product Strategy Board

One site at a time — a company, a country and a marketplace. Prices from two sites are never pooled on one axis.

Presentation

Print / PDF

SCENARIO — 1 simulated price override on Kitchen Mama|US|Amazon. These are not prices the company charges, they are not saved anywhere, and they disappear when this page is reloaded.

Scenario · Unsaved 3

this source carries no price status

26 listings · 22 with a price to plot

Meeting scenario

COMPANY	COUNTRY	MARKETPLACE	CURRENCY
Kitchen Mama	US	Amazon	USD
3 listings in "Can Opener" would be simulated on this site — all of them at the same figure, because a promotion is one price. Applied: Proposed price · Set proposed price 19.99 · Can Opener · 3 listings. The original position stays on the chart as a hollow marker. Active overrides: 1 · simulated on screen: Can Opener · Can Opener · Can Opener · held in this page only, and cleared by a reload.
